OBJECTIVE

I am an accomplished Agile Certified Professional with strong IT Consultant experience as well as hands on experience in implementing SAFe Agile practice for various Enterprise initiatives. I am seeking a role where I can apply my experience as a proven facilitator, collaborator and problem solver.

PROFESSIONAL SUMMARY

- Strong subject matter expert in the Agile framework serving as a Scrum master and Delivery Manager leading and guiding scrum teams using proper scrum techniques.
- Overall 9+ years of experience as a Business Analyst, Scrum Master and Project/Program Manager with knowledge and experience in Software Development Life Cycle (SDLC) within various industries; namely Oil and Gas, Financial Services, Software Asset Management and Energy Services.
- Highly analytical in developing the methods and measures to meet requirements and solve any issues that arise during the project.
- Extensive experience in facilitating user group meetings with cross functional teams.
- Ability to wear multiple hats and can work on multiple projects concurrently while still delivering on all tasks.
- Experience in customer / client interaction, deep understanding of business systems requirements.
- Motivated self-starter with exceptional team building, leadership, and interpersonal skills.
- Proven verbal and written communicator with ability to appeal to different audiences.

PROFESSIONAL EXPERIENCE

CRAYON SOFTWARE EXPERTS   **May 2020 - Present**
Program/Agile Delivery Manager
Responsibilities:

- Manage several projects within the organization across multiple business units such as Cloud Innovation and Technology (AI/ML Team), Cloud and Software Optimization as well as general Cloud Services.
- Lead organizational Agile adoption, leading training and implementation effort across the organization.
- Provide direction to internal personnel on delivering maximum value related to client needs and goals while pro-actively managing expectations and building a positive client experience.
- Responsible for facilitating Sprint Ceremonies for each scrum team as well as managing the product release process.

o Work with Product Managers to define roadmap for each product by prioritizing the work that needs to be done.

CHEVRON   **Jul 2019 – May 2020**
Sr. Scrum Master
Responsibilities:
  o Create meaningful sprint status charts/reports to provide visibility of Team and Sprint Performance.
  o Maintained a list of risks, issues, and concerns; communicated high level items with Program Manager. Also managed scope creep and plans to resolve those changes.
  o Assist Agile coach in Agile transformation for the entire business unit, active facilitator in Program Increment planning.
  o Led a coordinated effort involving multiple internal groups with deployment of several RPA tools for Major Capital Projects in the Gulf of Mexico.
  o Improved project productivity and overall output through coaching, improving collaboration amongst team members and adopting a growth mindset.

HONT GLOBAL   **Jun 2018 – April 2019**
Project Manager/Scrum Master
Responsibilities:
  o Lead and supported Scrum team in following proper Scrum techniques including Sprint ceremonies such as the "daily stand up" etc…
  o Responsible for helping team determine workload for each sprint as well as team velocity by using different estimation techniques.
  o Assisted Product owner in maintaining product backlog and delivering clear and concise user stories.
  o Guided scrum team through each sprint while removing impediments along the way.
  o Responsible for reporting team inter-dependency status within Agile enterprise.

EDF ENERGY   **Jan 2016 – April 2018**
Project/Program Consultant
Responsibilities:
  o Hosted requirement sessions with stakeholders of the commercial energy pricing engine project with input from the scrum team.
  o Assisted Product Owner in hosting User Story writing workshops and documenting all findings in a readable format for all project team members to comprehend.
  o Credited with increasing industrial unit revenue by an average of $5million every year by improving the speed to market process for products.
  o Improved scrum team overall efficiency through each sprint over the course of the project by certifying "acceptance criteria" and "definition of done" to avoid ambiguity.
  o Responsible for creating training documentation and assisting in training demo sessions.

INDEX BROOK INTERGRATED   Jul 2013- Dec 2015
Sr. Business Analyst
Responsibilities:

- o Facilitated Joint Application design sessions with multiple business units such as engineering, HSE and project services to deliver a business requirements document (BRD) for all to review and sign-off.
- o Identified processes and clearly documented them using Microsoft Visio; this helped reduced conflicts regarding several business processes.
- o Created and maintained the Requirements Traceability Matrix (RTM) to ensure all approved business requirements were properly tested.
- o Assisted with the creation of training manuals and training of key personnel.

FROST NATIONAL BANK   Jun 2011 – Jul 2013
Business Analyst
Responsibilities:

- o Conducted meetings/interviews with stakeholders to collect business requirements. This information along with the vision document was used to transform business requirements into System Requirement Specifications.
- o Identified the business requirements from the end users keeping in mind their need for the application and documenting it in MS Excel and MS Visio for the developers.
- o Conducted milestones planning of the project through walkthroughs and meetings involving various leads from development, QA and technical support teams.
